## EXPERIENCE

---

- **Tata Consultancy Services** May 2024 – Present  
*Assistant Systems Engineer | Tata Steel Netherlands Project* Pune, India
  - **Python Fundamentals & OOP:** Applied strong **OOP fundamentals and core data structures** (lists, dicts, sets, strings, lambda expressions) daily while building and maintaining Python services for a **100+ module** Mainframe-to-microservices modernisation.
  - **Databases:** Worked hands-on with **SQL/PL-SQL** databases writing queries and designing schemas to support application data needs.
  - **Version Control & Collaboration:** Used **Git** for version control within an **Agile/Scrum** team; communicated technical designs and solution approaches clearly to **12+ cross-functional stakeholders**.
  - **Debugging & Production Support:** Diagnosed and resolved **30+ production issues** through root-cause analysis, applying strong analytical and problem-solving skills; mentored 2 junior engineers – awarded **TCS Spot Performer (2025)**.

## TECHNICAL SKILLS

---

- **Python:** OOP Fundamentals, Data Structures (List, Dict, Set, Strings, Lambda), Algorithms
- **Web Frameworks:** Django, Node.js, Express.js
- **AI/LLM:** Prompt Engineering, AI-Assisted Development (Claude, ChatGPT, Copilot)
- **Databases:** SQL / PL-SQL, MongoDB, MySQL
- **Version Control & DevOps:** Git/GitHub, GitHub Actions, Jenkins, Docker
- **Core:** Data Structures & Algorithms, Problem-Solving, Analytical Skills, Written & Verbal Communication, Agile/Scrum

## PROJECTS

---

- **Logfile Browser** July 2026 – July 2026  
*Python, HTTPS Authentication, Multithreading*
  - **Developed a Python-based Production Log Browser** that automated log discovery across live directories and archived ZIP files, reducing manual production issue investigation time through recursive search and keyword-based filtering.
  - **Designed and implemented a multithreaded log analysis tool** using Python, enabling efficient traversal of production log repositories with concurrent processing, timestamp-based filtering, and line-by-line keyword search.
  - **Built an internal desktop application using Python (Tkinter)** that authenticated against secured production servers, searched compressed and live log files, and provided engineers with a streamlined interface for faster root cause analysis.
- **WhatsApp Automation Bot** Jun 2025 – Aug 2025  
*Node.js, Express, MongoDB*
  - Built a **microservice-based chatbot** with modular command routing and RBAC access control, using MongoDB for session persistence – cut downtime by **40%**.
  - Implemented error-handling middleware for webhook payloads, API rate-limiting, and network timeout management.

## EDUCATION

---

- **Bengal College of Engineering and Technology** Aug 2019 – Jun 2023  
*B.Tech - Computer Science and Engineering | CGPA: 9.15* Durgapur, India
  - Graduated in the **top 5%** of the batch with First Class Honours.

## ACHIEVEMENTS & CERTIFICATIONS

---

- Solved **250+ DSA problems** on LeetCode (Python & Java) – strong foundation in data structures and algorithms.
- **HackerRank Certified** in Java and SQL – top 15% among 3 million+ users.
- **TCS Spot Performer Award (2025)** – delivery excellence and junior engineer mentorship.
